

## LOSING TRICK COUNT VERSUS HCP by Maritha Pottenger

Normally, we only apply LTC once we have a fit. With 6-5 hands or with a 7-card or longer suit, we are allowed to “assume” that we have a fit. **The more balanced the hand, the more we use HCP.** Remember, the more balanced the hand, the better it will do on defense. Very distributional hands are more offensively oriented.

|                                  | <i>Losers by LTC</i>                                                                                                                                                                                                      | <i>HCP</i>                                                                                                  |

---

With simple raise of major, Responder will have 9 losers (although sometimes 8). Opener needs 6 losers to make Help Suit Game Try. With 5 losers, bid game. With more losers, pass!

With limit raise of major, Responder should have 8 losers (occasionally 7). Opener should bid game with any 6 loser hand. With 7 losers, game is against the odds but some 7 loser hands may have enough appeal to take a risk. Kantar says that the 5-3-3-2 Opener should not go opposite a LR without NT values in HCP.

NT raises are usually based on HCP. However, with a very weak 9-loser hand, it is OK to go to game opposite a 2C followed by 2NT Opener. E.g., xx Jxxxxxx xx xx.

When partner opens a Weak Two, Rule of 17 applies. Aces and Kings are much more important than Queens and Jacks. With a balanced hand, you need a good chance of taking 4 to 5 tricks in your hand or 6 Losers. (Partner is likely to have 5 winners in her suit or 8 Losers by LTC.) With distributional hands, and a big fit, think in terms of cover cards and visualize partner's hand. If partner opens 2S and you hold Kxxx x KQxx Axxx, you have a good chance of losing only 1 heart, 1 diamond, and 1 club. Bid game.

Opposite a 3-level preempt, you want at least 2½ quick tricks to raise to game in major. Expect partner to have 8 losers, so go to game with 6 losers. Again, need Aces and Kings more than Queens & Jacks.

---

---

To *bid* over opponent's Weak Two, should have 7 or fewer losers. Over Weak 3, 6 or fewer losers. To be forced to 4 Level, 5 or fewer losers. The more balanced the hand, more you should think of DEFENSE.
